

Resource Guide

Type 2 Diabetes Resources for Older Adults

Reliable organizations participants can use after the program for diabetes education, physical activity guidance, nutrition information, and ongoing self-management support.

Centers for Disease Control and Prevention (CDC) - Diabetes

Diabetes basics, living with diabetes, healthy eating, physical activity, and prevention information.

<https://www.cdc.gov/diabetes/>

CDC - Physical Activity for Older Adults

Age-appropriate aerobic, muscle-strengthening, and balance activity guidance.

<https://www.cdc.gov/physical-activity/php/about/index.html>

National Institute of Diabetes and Digestive and Kidney Diseases (NIDDK)

Plain-language information on healthy living with diabetes, food, activity, medicines, and monitoring.

<https://www.niddk.nih.gov/health-information/diabetes>

American Diabetes Association

Diabetes education, fitness, nutrition, complications, and standards-based patient information.

<https://diabetes.org/>

National Institute on Aging

Healthy aging information relevant to physical activity, medications, nutrition, and maintaining independence.

<https://www.nia.nih.gov/health>

How to use this guide

Choose one or two resources that match your current goal. Save the page, print information if helpful, and bring questions to your diabetes care team. Online information should support - not replace - individualized medical advice.
