

Social Media Plan

Managing Type 2 Diabetes in Older Adults

Campaign purpose: Reinforce the six-week education program with short, practical messages that encourage older adults and caregivers to use safe diabetes self-management behaviors.

Audience & Platforms

Primary audience: Adults age 65+ living with Type 2 diabetes. **Secondary audience:** family members and caregivers. Primary platforms: Facebook and community/senior-center social pages because posts can be shared, saved, and read in a larger format.

Goals

1. Increase awareness of the six weekly program topics. 2. Reinforce one achievable behavior at a time. 3. Direct participants toward reliable diabetes resources and local education opportunities. 4. Encourage engagement through simple prompts rather than fear-based messaging.

Posting Schedule

Week	Theme	Sample Post / Call to Action
1	Diabetes foundations	Knowing your numbers is a skill. This week, learn what your blood glucose readings mean and write down on
2	Nutrition	Build a balanced plate: non-starchy vegetables, lean protein, and a portion of carbohydrate foods. Small mea
3	Physical activity	Movement counts. Try a short walk or a few minutes of chair exercises at a comfortable pace. Choose an act
4	Medication	Know what you take, why you take it, and when you take it. Bring an updated medication list to appointments
5	Monitoring & foot care	Check, record, respond. Keep track of glucose readings as recommended and make foot checks part of your
6	Long-term support	Diabetes management is ongoing. Identify one person, program, or trusted resource that can support you aft

Engagement & Evaluation

Use one post per week plus one reminder before each session. Track reach, shares, reactions, link clicks, and comments. At the end of six weeks, compare which topics generated the most engagement and ask participants whether the posts helped them remember or use a program skill.

Tone & Accessibility

Use plain language, large readable graphics, high contrast, short captions, alt text, and supportive wording. Avoid shame, alarmist claims, or promises of a cure. Include a reminder to contact a healthcare professional for individualized medical questions.
